

## Issues in jobs.weekday.works

1. After jobs are posted if the job application is closed in less than 30 days our website shows till 30 days are completed– website is not real time.
2. No match fit a/q my resume, lacks personalized recommendation jobs like “top jobs for me”
3. When jobs referral is clicked if job referral; is not available it open week day extension
4. No dark mode in website
5. Complex navigation and a non-intuitive interface can make browsing and applying for jobs cumbersome.
6. When no filter is selected jobs visible should match fit according to my resume
7. An option to close this section should there when the user gets it doesn't require them on

screen it covers a lot of space.

8. Limited Customer Support -Difficulty in reaching support for assistance or issue resolution.
9. This part is irrelevant for the user and is anyways incomplete. This should come when the user clicks on apply and wants to know more.

10. Option to minimize the filter section after he is done with applying filters should be available
11. Alum-network of candidate (if any) working in this company can be added in apply section and can be as filter so they reach out to them to know more about the job.
